Communication & Electronics Engineering Student | Future Tech & Finance Engineer | CCNA Certified Trainee | Embedded Systems Developer

---

PROFESSIONAL SUMMARY

Motivated and adaptable engineering student with multidisciplinary technical knowledge in communication and electronics engineering, networking, embedded systems, electrical distribution, and power plants. Passionate about solving real-world problems through technology, leadership, and innovation.

Known for being a strong team player with courage, creativity, honesty, and resilience. Experienced in field work, technical supervision, and developing practical engineering projects including smart systems and networking solutions.

Driven by a “Fighter” mindset: continuously learning, improving, and adapting to future technologies in a rapidly changing AI-driven world.

CERTIFICATIONS

• **CCNA Training Certificate – NTI (National Telecommunication Institute)**

TECHNICAL SKILLS

• Python, MATLAB, Proteus, Cisco Packet Tracer
• Arduino Programming & Embedded Systems
• PCB Basics & Smart Systems Design
• Routing & Switching Basics
• Power Plants & Electrical Distribution
• Leadership, Communication & Teamwork

PROJECTS

• Smart Car System
• Smart Home Automation System
• Fire Alarm System
• Power Supply Project
• Network Projects in Packet Tracer

CAREER OBJECTIVE

Seeking opportunities in telecommunications, finance engineering, defense technology, and multinational technical industries while growing from technical engineering into finance engineering and strategic management.

PERSONAL BRAND MESSAGE

“FIGHTER”

I believe human creativity, leadership, and engineering innovation will always stay valuable even in the age of AI.
