OBJECTIVE

A dedicated Communications and Electronics Engineering student with field experience as a Biomedical Engineer Intern at Siemens Healthineers and practical training at West Delta Electric Production Company (WDEPC). Seeking an engineering internship or entry-level position in biomedical engineering, telecommunications, site operations, or embedded systems. Eager to leverage technical knowledge in medical imaging equipment, signal processing, and software development (Java & Python) to contribute effectively to field service operations and engineering projects.

EDUCATION

Bachelor in Communications and Electronics Engineering | Expected Graduation: 2027

Faculty of Engineering, Damanhour University, Beheira, Egypt

Relevant Coursework: Signal Modulation (AM, FM, PAM), Wave Propagation & Waveguides, Circuit Analysis, Digital Communications, Acoustics, and Transmission Lines.

PROFESSIONAL EXPERIENCE & INTERNSHIPS

Biomedical Engineer Intern | July 19, 2026 – July 30, 2026

Siemens Healthineers | Alexandria Branch, Egypt

- Completed Round 1 intensive technical field training in biomedical engineering and healthcare customer service support.
- Gained hands-on operational exposure to advanced Siemens Healthineers medical imaging modalities and diagnostic equipment.
- Studied operational workflows, preventive maintenance protocols, and site troubleshooting methodologies in a live healthcare environment.
- Observed field service engineering operations, client communication strategies, and technical escalation procedures.

Practical Training Intern, Communications & Electronics | July 2026 – August 2026

West Delta Electric Production Company (WDEPC) | New Abu Qir Power Station, Egypt

- Completed two months of practical training at a power generation station under the Training Sector of the Technical Affairs Division.
- Gained exposure to power plant operations, electrical systems, and technical workflows in a live industrial environment.
- Received high evaluation scores in the official training reports: Attendance 97/100, Conduct 98/100, Benefit 97/100 (July) and 99/100 (August).

Professional Programming Diploma (Java & Python) | Jan 2023

American Board of Professional Studies (ABPS) - 70 Training Hours

- **Desktop Application Development (Java):** Mastered Object-Oriented Programming (OOP) principles, Graphical User Interface (GUI) design, and logical architecture for desktop software.
- **Web Development & Automation (Python):** Developed back-end components, scripts, and applications tailored for web services and deployment environments.

TECHNICAL SKILLS

- **Biomedical & Field Systems:** Medical Imaging Equipment Workflows (Siemens Healthineers), Healthcare Customer Service & Field Support, Site Troubleshooting & Preventative Maintenance.
- **Programming:** Java (Desktop Apps, OOP), Python (Web Development, Scripting).
- **Telecommunications:** Radio Frequency (RF), Signal Modulation, Waveguides, Transmission Lines.
- **Electronics & Systems:** Arduino Uno, Bluetooth Hardware Integration (HC-05), Circuit Design.
- **Operating Systems:** Linux (Kali Linux Distribution), Network Enumeration (Nmap, SMBclient).
- **Hardware Maintenance:** Low-level hardware diagnostics, factory mass production utilities (FirstChip MpTools), Windows service registry recovery.

ACADEMIC & TECHNICAL PROJECTS

Bluetooth-Controlled Smart Car Project | 2025

- Designed and assembled a remote-controlled embedded vehicle utilizing the Arduino Uno microcontroller platform.

Hardware Recovery & OS Optimization | 2026

- Diagnosed and recovered a corrupted 128GB flash drive reporting "0 bytes" using factory-level low-level formatting tools (FirstChip MpTools).

LANGUAGES

Arabic: Native Speaker | **English:** Very Good
